Innovation Partnership Grants

* indicates a required field

Introduction

Aus4Innovation is a partnership between Vietnam and Australia to strengthen the Vietnamese innovation system and prepare for Vietnam's economic and digital future.

The Innovation Partnership Grants are a critical feature of the program. The purpose of the grants program is to provide targeted funds to scale already tested activities to address emerging challenges or opportunities in any sector of Vietnam's innovation system. Tested activities implies technologies or activities with an existing proof of concept and articulated market segment, or path to impact, and an existing relationship between an Australian and a Vietnamese entity.

The Grants are competitive and will be delivered in two rounds. Expressions of interest for round two can be submitted until COB 23 February 2020 (AEST). This second round will focus on developing partnerships between organisations in Australia and Vietnam.

Possible topics include (but are not limited to):

- Adoption of digital technology into small enterprise
- High value goods: quality, individualisation, equality, humanity and provenance
- Increasing labour productivity
- Agriculture 4.0: productivity, export market access, and food provenance
- Manufacturing 4.0: data, cyber-physical-biological systems, AI, and additive manufacturing
- Smarter cities
- Cyber security and privacy in the 4th Industrial Revolution

It is anticipated that technology areas relating to Industry 4.0 may include (but are not limited to): robotics, big data, additive manufacturing, systems integration, autonomy, AI, Internet of Things, cyber-physical-biological systems, and augmented reality.

Applications will be reviewed and ranked on aspects of partnership, innovation, relevance, readiness and social impact.
